# Free-Standing Bath

Free-standing baths are the perfect alternative to give your bathroom space the sophisticated spa feeling.

## IT'S RECOMMENDED IF YOU:

- Are looking for an outstanding design;
- Want to have the choice between more classic claw-foot designs and super modern designs;
- Prefer a bath that is easy to install and have enough space for it;
- Want to have freedom to place your bath accordingly to your bathroom design.

## THINGS TO CONSIDER:

- Free-standing bath can be more expensive than drop-in baths;
- They can be a lot heavier than other bath styles;
- It is not recommended to use a free standing bath combined with a shower;
- The space for shampoo, soap and candles might be limited when compared to other options.

# Drop-In Bath

Drop-in baths are a great cost-efficient alternative to create beautiful bathroom spaces. With a variety of shapes and sizes, it is easy to find the perfect option to fit your design.

## IT'S RECOMMENDED IF YOU:

- Are looking for a more affordable bath option;
- Need to make the most out of the bathroom space you have;
- Want a bath that can be used combined with a shower;
- Enjoy having more storage space for shampoos, soaps and candles;
- Are looking for a bath that is also easy to clean.

## THINGS TO CONSIDER:

- Drop-in baths will be fixed, so there isn't much flexibility in terms of design;
- Usually you will need to invest on the surround to make it stand out;
- Installation can be costly as it will require sealing, mounting and other things.

# Spa Bath

Spa baths are a great solution for those looking to have an in-house spa. With hydrotherapy features, they can be beneficial for some health issues.

## IT'S RECOMMENDED IF YOU:

- Are looking to transform your bathroom into a place to relax;
- Want to add value to your home with a high-end bath;
- Want to improve your health as part of a hydrotherapy protocol;
- Have the necessary space to fit a spa bath as they tend to be larger than regular baths.

## THINGS TO CONSIDER:

- The spa baths are often more expensive than regular baths due to their extra features and detailed installation;
- They require a more thorough cleaning and maintenance;
- They may increase utility costs compared to regular baths.

# Free-Standing Spout

Free-standing spouts will be installed on the floor to bring the traditional bath set-up with a modern approach.

IT'S RECOMMENDED IF YOU:

- Have the additional space to install it;
- Want to keep the original bath design look;
- Prefer to use a mixer instead of two separate taps;
- Prefer to have the water falling from a higher level;
- Want to keep free access to the spout in case of repair.

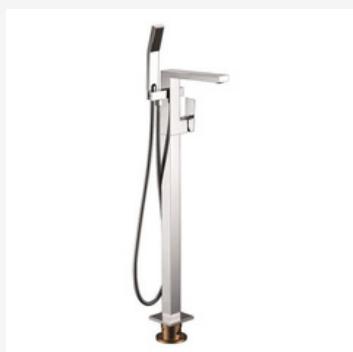

THINGS TO CONSIDER:

- Additional space for installation is required;
- The investment in labour for installation as it will require a different pipe work;
- It will take a little bit more of time for cleaning;
- Choose well the position to avoid having to change and re-doing the installation.

# Wall-Mounted Spout

Wall-mounted spouts will be installed directly on the wall, giving your bath a clean and modern look.

## IT'S RECOMMENDED IF YOU:

- Want a modern and clean look;
- Want to explore different colours and styles;
- Are looking to save up space in your bathroom;
- Want a easy-to-clean- solution that also looks good;
- Want to have either a mixer or a three-hole tapware option.

## THINGS TO CONSIDER:

- The pipework will need to be hidden on the wall;
- Installation cost can be a bit more expensive due to plumbing arrangements;
- Wall-mounted spouts can only be used with baths that are placed against the wall;
- Although modern, it might not give you the classic look you may be looking for.
